Fra. M - Production Services Division should prepare 15 Apr 1966 with P+DS in the decision.

Agreed. Can you secure? 25X1

although development on a lead-tab feed [redacted] apparatus is required before operational material can be produced from this machine, I recommend that this device be closed-out as a project and that P+DS retain further development control until PSD is satisfied with the results. A contract should be sought to develope the feed system required. (Parts should be ordered)
